# Basic Coding Course

**“Sequencing”**

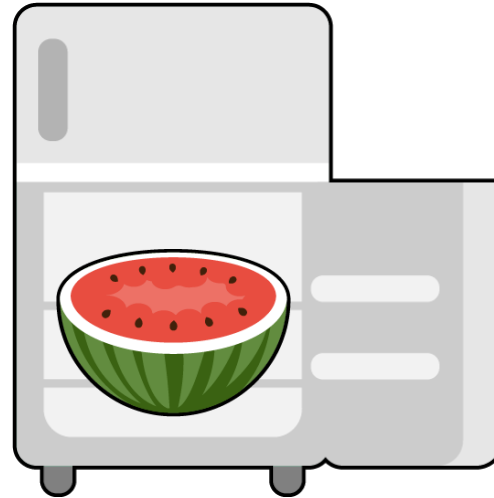

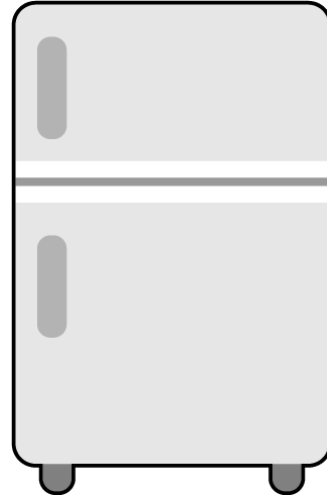

**If the panda wants to put the watermelon in the refrigerator, it should follow the steps as below:**

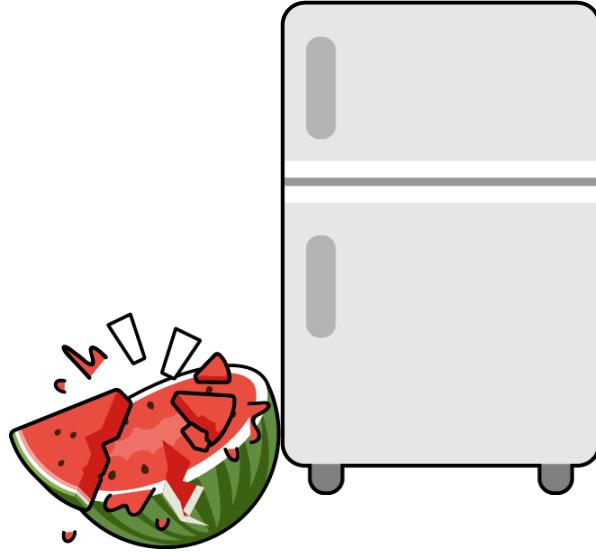

**Step 1 : Open the fridge.**

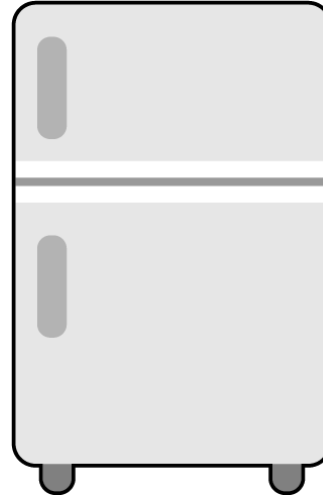

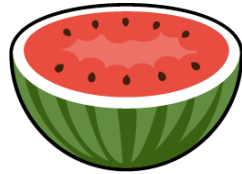

**Step 2 : Put the watermelon in the fridge.**

**Step 3 : Close the fridge.**

**You have to follow the sequence of steps, otherwise...**

A set of ordered steps for accomplishing a task is called **Sequencing**.

Open the fridge

Put the watermelon in the fridge

Close the fridge

**In computer programming, we should follow the sequence of steps as illustrated above when putting the watermelon in the fridge.**
